-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This is a response to the amendment + remarks filed on 09/12/05.

- Claims 1-53 are pending.

After thoroughly considering the amendment + remarks, the previous rejections and/or allowable subject matter have been withdrawn in view of the amendment + remarks. After thoroughly considering the amendment + remarks, the examiner finds that a restriction is required for this application because the claimed groups recite different subject matters, see the followings.

Election/Restrictions

This application contains claim groups directed to the following patentably distinct species of the claimed invention:

Group	Invention
I.	Claims 1, 2, 4, 14-17, 27-30, and 42-51 drawn to the connectivity strength corresponding to a quantification of the at least one connection between the first symbol and the second symbol.
II.	Claim 3 drawn to the side selected according to a connectivity strength corresponding to the number of connection between the first symbol and the second symbol.
III.	Claims 5-8, 18-21, 31-34, 52, and 53 drawn to the connectivity strength corresponds to a number of connections existing between the at least one pair of symbols.
IV.	Claims 9-11, 22-24, and 35-37 drawn the connectivity strength being determined by the at least one connection in between the at least one pair of symbols.
V.	Claims 12-13, 25-26, and 38-39, drawn to at least one predefined symbol in the netlist, selecting as the next pair of symbols.
VI.	Claims 40 and 41, drawn to signals defining component symbols and connections generated according to a netlist.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any

Art Unit: 2825

claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
